0.3	October 2025	New policy template adopted. The inclusion of a limit on intralesional steroid injections added into the policy statement. Review date changed to October 2028.	Assistant Commissioning Manager – Elective Care	CPRG

1.0 Background

The procedures listed in this policy are all considered to be cosmetic procedures that are usually used to improve your appearance rather than your health. The NHS does not usually fund cosmetic procedures and therefore generally these treatments cannot be accessed in Gloucestershire. If your doctor believes that you have particular circumstances that mean one of these treatments should be funded for you, they can submit a funding request to the ICB via the Individual Funding Request (IFR) process for consideration.

2.0 Policy statement

Policy category	Policy details
INNFB	The following procedures will only be funded in exceptional circumstances following a successful application via the Individual Funding Request process: • Intralesional steroid injections to treat keloid and hypertrophic scars up to a maximum of 3 injections over 6 months (exceptions will only be considered where scarring severely impacts physical function or causes severe pain) • Cosmetic scar revision (excision) for keloid and hypertrophic scars (exceptions will only be considered where scarring impacts severely in physical function) • Labiaplasty (unless where labia are directly contributing to recurrent urinary tract disease or infection or where repair of the labia is required after trauma) • Vaginoplasty, hymenopathy • Penile enlargement • Tattoo removal (by any method) • Skin 'resurfacing' e.g., dermabrasion, laser and chemical peels • Treatments for hirsutism e.g. eflornithine (Vaniqua®) / hair depilation

3.0 Patients who are not eligible for treatment under this policy

Patients who are not eligible for treatment under this policy may be considered on an individual basis where their GP or consultant believes exceptional circumstances exist that warrant deviation from the rule of this policy.

Individual cases will be reviewed at the ICB's Individual Funding Request Panel upon receipt of a completed application form from the patient's GP, Consultant or Clinician. Applications cannot be considered from patients personally.

4.0 Connected policies

Removal of Benign Skin Lesions
